

*Turbicellepora ampla* (Kirkpatrick, 1888). Tilbrook, Hayward & Gordon, 2001, p.94.

*TURBICELLEPORA AMPLA* (KIRKPATRICK)

*Schizoporella ampla* Kirkpatrick, 1888: 76, pl. 7, fig. 4.

*Stephanosella bernardii* Harmer, 1957: 1051, pl. 74, figs 21–23.

*Turbicellepora ampla*: Hayward, 1988: 341, figs 6d,e; Ryland & Hayward, 1992: 284, fig. 27c,d.

*Remarks*

A single, small, infertile colony of this species was found encrusting a small piece of coral rubble at Erakor Island. Originally described from Mauritius in the Indian Ocean, it has subsequently been noted in the Indo–Malayan region and the Great Barrier Reef. The present record extends the known range eastwards into the Coral Sea.
